

PRATHAM GOSAI

IT & Network Engineer | AI Automation | Full-Stack Developer

Surat, Gujarat, India | prathamgosai2004@gmail.com
[linkedin.com/in/pratham-gosai-066789312](https://www.linkedin.com/in/pratham-gosai-066789312) | github.com/prathamgosai

SUMMARY

IT and network engineer who also builds the software layer. Over 10 months of hands-on L1/L2 desktop and network support across Windows systems, LAN/WAN infrastructure, firewalls, and NAS storage, combined with production full-stack delivery: designed and built WorkforceIQ, a workforce management platform covering 370+ staff for a multi-brand restaurant group. Currently automating live hotel operations using the Claude API. Anthropic-certified in Claude API development and AI Fluency. Open to on-site, hybrid, or remote roles.

EXPERIENCE

AI Automation / Reservationist

K. Girdharlal International Ltd. / Bookends Hospitality - Surat, India | Jun 2026 - Present

- Automated repetitive reservation and administrative tasks using AI workflows built on the Claude API.
- Improved customer response times by introducing AI-based workflows into daily operations.
- Managed website content and booking updates.
- Coordinated with hotel and operations teams and maintained accurate customer records.
- Designed and built WorkforceIQ, the group's restaurant workforce platform, covering 370+ staff.

Desktop Engineer & Network Engineer

Premware Services India LLP - Surat, India | Sep 2025 - Present

- Provide L1/L2 desktop and network support for end users.
- Install, configure, and maintain Windows desktops, laptops, printers, and peripherals.
- Diagnose hardware, software, and network connectivity issues.
- Manage user accounts, system configurations, and software installations.
- Support LAN/WAN infrastructure and basic network security.
- Perform preventive maintenance and system updates, and document incidents for reuse.

PROJECTS

WorkforceIQ - Workforce Management Platform

Jun - Jul 2026 | github.com/prathamgosai/staff-management

Full-stack platform covering the complete employee lifecycle - directory, scheduling, attendance, leave, allocation, and forecasting - for 370+ staff across a multi-brand, multi-outlet restaurant group.

- Built an auto-scheduling engine that generates weekly rosters from 3 rotating shift templates across 7 days, with per-staff manual overrides that persist through future rotations.
- Implemented database-backed, live-editable role-based access control (RBAC) across 6 account types.
- Delivered attendance, leave, allocation, and performance dashboard modules.
- Integrated WhatsApp notifications via the Meta Graph API, alongside email notifications.
- Built a Python/FastAPI microservice for machine-learning staffing demand forecasting.
- Hardened authentication with single-use SHA-256-hashed refresh-token rotation, rate limiting, and a forced password-change flow.
- Imported and cleaned real employee data through numbered, reversible SQL migrations with audit trails.
- Architected a pnpm + Turborepo monorepo: NestJS API using raw parameterized SQL on PostgreSQL 16, Next.js 14 + React 18 frontend, shared TypeScript package, and Redis job queues. Deployed to production on Render with Supabase-hosted PostgreSQL.

Technologies: TypeScript, Next.js, React, NestJS, Node.js, PostgreSQL, Redis, Python, FastAPI, Tailwind CSS, TanStack Query, Turborepo

SKILLS

Infrastructure & Networking: Desktop support (L1/L2), Windows administration, LAN/WAN, network troubleshooting, NAS storage

Security: Cisco firewall basics, system and network security, ethical hacking fundamentals, authentication hardening (token rotation, rate limiting)

AI & Automation: Claude API, prompt design, workflow automation, machine-learning demand forecasting (FastAPI)

Full-Stack: TypeScript, Next.js, React, NestJS, Node.js, PostgreSQL, Redis, Tailwind CSS, TanStack Query, Turborepo

Practices: Technical documentation, incident handling, reversible SQL migrations, monorepo tooling

EDUCATION

B.Sc. Information Technology (Infrastructure Management Services)

Bhagwan Mahavir University - Surat, India

Cloud Computing & Cybersecurity Track

PureSkill IT Training Academy - Surat, India

Cisco Firewall Security; Ethical Hacking.
